HERITAGE

Over the centuries, the Indian Subcontinent has grown into a veritable Khazana (treasure-trove) of skilled craftsmanship and exquisite artforms that are without doubt among the best in the world.

These arts are not only a mirror of the cultural identity of the artisans, but also reflect the glory of Indian Heritage to the world.

Now however, modern trends and a lack of awareness among today's generations have drastically changed the craftsman's environment.

And although he still responds to the threat of "progress" with silent pride and ancient skill, craftsmanship in India has been facing a steady decline.

Our mission at Sedr Heritage is to revive these dying arts by spreading awareness at a societal level and by re-instilling a sense of value for our beautiful and vast heritage through various initiatives.

We promote and showcase the finest of hand-crafted Heritage Products. Each piece is a timeless tribute to our culture, made by highly skilled artisans who work painstakingly for weeks (and even months depending on the artform) to produce the precious article that we now present to you.

We also promote rare regional specialities such as spices & agro-products that are exclusive to the region they are produced in- such as Kashmiri Mongra Saffron, considered to be the best in the world, but now in danger of extinction due to demoralized farmers and exploitive middlemen.

Our goal is to motivate farmers and artisans by putting in the extra effort to source our spices and products directly from the producers themselves, thus ensuring the middleman's profits are removed entirely and instead used to benefit the farmers, artists and craftsmen.

By purchasing our carefully curated products, you not only get to possess a beautiful piece of heritage but also get to join us in our efforts to help improve the quality of life for those who create these products, all while doing your bit to preserve the richness and beauty of India.

Now showcasing *Project Kashmir* - India's very own "Paradise on Earth".

ART TRADITION : KANDKARI

The Kandkari Craft is a rare medieval Kashmiri art tradition being promoted extensively by Sedr Heritage.

Kandkari is the engraving technique used to hand-craft exquisite copperware in the Kashmir Valley. The traditional designs etched into the copperware include local motifs such as the Chinar leaf, Mehrab and the Lotus flower.

Known for its extensive health benefits, copper has been used to make kitchen and tableware for centuries in India, as well Central Asia including Turkey and Persia.

The flagship product of our Kandkari Line, the Samovar is a real show stopper and takes a place of pride in any tea lover's home. This stunning beauty is a fully functional piece used to prepare tea in the traditional Kashmiri way.

The detailed engraving on the Samovar depicts various motifs of cultural significance, such as the famous Chinar leaves of Kashmir.
